Midterm 2 practice

UCLA: Math 32B, Fall 2019

Instructor: Noah White
Date: May, 2018
Version: practice

- This exam has 4 questions, for a total of 40 points.

- Please print your working and answers neatly.

- Write your solutions in the space provided showing working.

- Indicate your final answer clearly.

- You may write on the reverse of a page or on the blank pages found at the back of the booklet however these will not be graded unless very clearly indicated.

- Non programmable and non graphing calculators are allowed.

ID number: _____

Question	Points	Score
1	10	
2	8	
3	8	
4	14	
Total:	40	

1. (a) (5 points) Compute the center of mass of the region in the xy-plane above the x-axis and below the curve $y = 1 - x^2$. Assume a constant mass density of 1.

(b) (5 points) Determine the surface area of the paraboloid

$$x^2 + y^2 = 2z, \quad 0 \le z \le 1.$$

2. (8 points) Consider the region $\mathcal{E}$ given by

$$0 \leq z \leq (y - x^2)^2, \quad x^2 \leq y \leq x.$$

Use the change of variables

$$x = u, y = v + u^2, z = wv^2,$$

to evaluate

$$\int_{\mathcal{E}} \frac{1}{y - x^2} \, dV.$$

3. Let $\mathbf{F}$ be a vector field given by

$$\mathbf{F}(x, y, z) = (y\cos z - yze^x, x\cos z - ze^x, -xy\sin z - ye^x).$$

(a) (4 points) Show that $\mathbf{F}$ is conservative.

(b) (4 points) Find a potential function for $\mathbf{F}$.

4. In this question we will calculate the surface area of the ellipsoid $\frac{x^2}{a^2} + \frac{y^2}{a^2} + z^2 = 1$.

    (a) (4 points) Find a parameterisation of the ellipsoid given above.

    (b) (5 points) Express the surface area as a double iterated integral.

    (c) (5 points) Evaluate the surface area when $a = 2$. You may use the fact that

$$\int \sqrt{1 + x^2} \, dx = \frac{1}{2}\sqrt{1 + x^2} + \frac{1}{2}\ln\left(\sqrt{1 + x^2} + x\right) + C.$$

This page has been left intentionally blank. You may use it as scratch paper. It will not be graded unless indicated very clearly here and next to the relevant question.
